

# Pure air, healthy spaces.

WM1000 Series

The increasing number of pollutants in indoor spaces makes them unhealthy. Praan WM1000 aims to purify the air in enclosed spaces with its state-of-the-art needle point Bi-polar ionisation technology. The air disinfectant is perfect for several applications and is capable of eliminating bacteria, viruses, and other microbes from limited to expansive spaces. It can be installed in exhaust systems, ventilation systems, and air conditioners.

---

Operating Voltage: 230VAC

Ampere: 35mA

Power Consumption: 7.5W

Dimensions: L-600mm, H-300mm, D-50mm

Colour: Milk White

## Product Installations

### Bipolar ionization inactivates pathogens like:

- SARS- Cov 2
- Corona virus
- Varicella zoster virus
- E coli bacteria
- Norovirus
- Legionella virus
- TB bacteria
- Pseudomonas bacteria
- Influenza
- Rhinovirus
- Staphylococcus bacteria
- Bacillus cereus bacteria

#### Suitable Applications

Suitable for all small rooms like living room, kitchen, bedrooms, receptions, conference rooms, office chambers, meeting rooms, class rooms, labs, etc.

#### Easy Installation

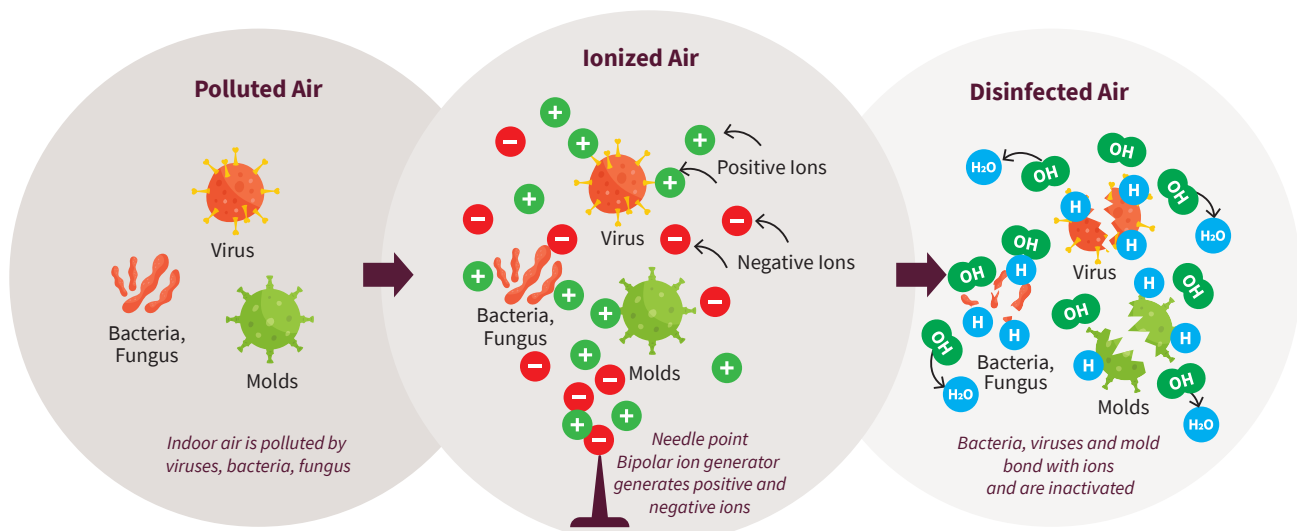

Installation is as easy as plug-n-play. The unit is wall mounted using screws and connect to a regular power source.

#### Excellent Sales & Support

All products are Made in India ensuring a robust sales and support network for hassle free support.

### How Bipolar Ionization Works
